

# **Project Roadmap **Draft**: AI-Driven Threat Hunting for Zero Trust**

Prepared by Saad Hanif

## Phase 1: Research & Strategy (Weeks 1–2)

- **Gap Analysis:** Identifying why traditional monitoring fails in Zero Trust environments.
- **Architecture Design:** Designing the flow between the **ELK Stack** (log ingestion) and the **LLM** (the reasoning engine).
- **Concept Note:** Immediate delivery of the 1-page proposal for supervisor approval.

## Phase 2: Implementation (Months 1)

- **Environment Setup:** Deploying a containerized environment (Docker) with Elasticsearch and Logstash.
- **LLM Integration:** Developing Python-based agents using **Ollama** or **LangChain** to process logs via "Prompt Engineering" for threat detection.
- **Validation:** Simulating network attacks to test the AI's detection accuracy.

## Phase 3: Thesis Documentation (Months 2–3.5)

- **Literature Review:** Comprehensive analysis of AI in Cybersecurity.
- **Methodology & Results:** Documenting the technical build and the performance metrics of the implementation.
- **Final Manuscript:** Drafting the full 60+ page academic document, including references and appendices.

## Deliverables & Terms

- **Full Ownership:** You will receive 100% ownership of the implementation code and the final thesis manuscript.
- **Documentation:** Complete technical documentation on how to run and explain the code.
- **NDA/Non-Disclosure:** All project details and data will remain strictly confidential.
- **Passing Standards:** The deliverables will be passing the decided length, plagiarism and Ai percentage.

---

## Important Compliance & Contact Notice

To ensure the security of this collaboration, please note the following:

- **Timeline: 1 month** (Included in the total 3.5 month) for the full technical implementation; **3.5 months** for the final thesis manuscript.
- **Communication:** Fiverr has strict policies regarding academic assistance and impersonation. Direct involvement in academic work can lead to immediate account deactivation.
- **Next Steps:** To discuss the specific technical requirements, final pricing, and a suitable mode of communication that protects our interests, please contact me directly at: **saadhaniftaj@outlook.com**
